## JRA1

### Tuning Requirements & Overall Integration

#### Objectives:

- improve understanding and meet requirements of wider user communities
- improve SDC service specifications/developments from a user perspective

WP7

JRA1

Tuning Requirements & Overall Integration

# SDC Scientific Committee

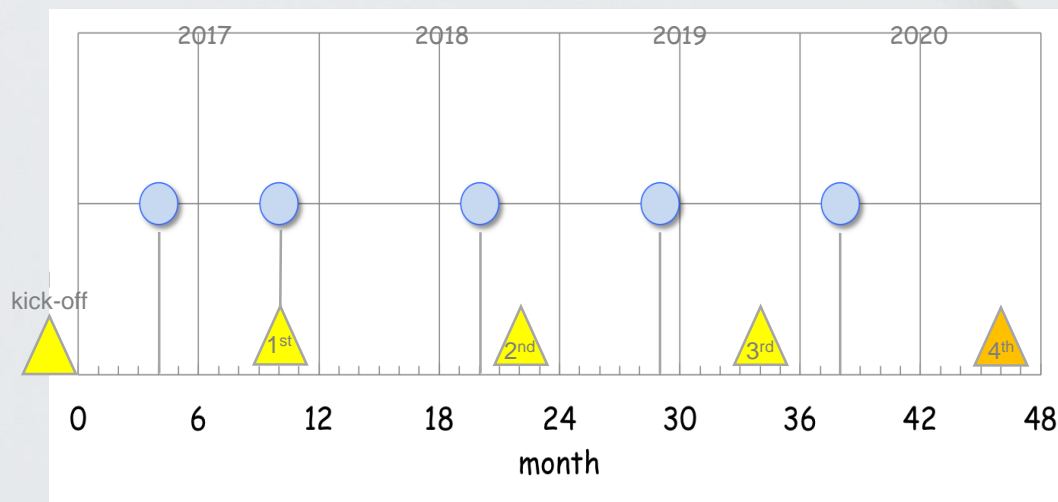

- represent user communities and their point of view on SDC services
- foster a deeper comprehension of the user perspective

# WP7

## Tuning Requirements & Overall Integration

Input requested for Final Report

- ❑ lessons learnt: what went well, or not too well, re the scientific dimension of the project
- ❑ future perspectives of marine data collection & management: how do you see this field developing, what are the chances for its (hopefully successful) continuity and what the relations with other European actors in the same domain (to ensure an EU-wide coherent and integrated approach)
- ❑ "... what would be essential for the future digital ocean landscape, as well as the UN Decade of Ocean Science for Sustainable Development (2021-2030), and the role to be played by SDC in that context"
